LANGUAGES

English - Professional Working Proficiency
Portuguese - Native

I am a front-end developer, Brazilian and European Citzen, based in Dublin, with a passion for creating appealing websites that are functional and beautiful.

As someone with a background in design, I have a keen eye for design and aesthetics and love working in teams, sharing knowledge, learning and completing projects that call for patience and attention to detail.

I graduated from a full-stack web development bootcamp from Ironhack in 2022, and now I'm currently looking for an opportunity as a front-end developer.

EXPERIENCE

DESIGN TECHNICIAN *Crown Roofing & Cladding*

Dublin - Ireland (2020-2022)

- Develop AutoCAD 2D details for various roof scenarios, using diverse waterproofing systems.
- Manage and compile in-house documents such as technical submittals, O&M manuals, ancillary certificates, and warranties.
- Liaise with suppliers to retrieve u-value, wind load and drainage calculations, and tapered insulation schemes.
- Educational development, courses, suppliers CPD, coaching/mentoring from Managers and Directors.

JUNIOR AUTOCAD TECHNICIAN *Empire Roofing Ltd*

Dublin - Ireland (2019-2020)

- Produce AutoCAD 2D technical drawings required to install Kingspan roof panels and waterproofing systems.
- Communication and soft skills with co-workers, introduction to the roofing industry, analysis and interpretation of structural steel drawings.

CATERING ASSISTANT *Noel Group*

Dublin - Ireland (2017-2019)

- Serve customers in a fast-paced hospital catering environment during breakfast and lunch.
- Customer service and interaction, competency in English and self-awareness skills.

ACCOMMODATION ASSISTANT *Noel Group*

Dublin - Ireland (2015-2017)

- Work in a high-paced environment attending to requests from guests and in-house departments, and general housekeeping duties.
- Customer communication and interaction, and always maintaining high standards.

INTERIOR CAD TECHNICIAN *Veggas Design Solution*

Brasília - Brazil (2010-2015)

- Design and develop detailed 2D drawings on AutoCAD for carpentry manufacturing and 3D images using software.
- Successful project implementation, excellent customer service, and ongoing educational development were further achievements.
